Players: 2–4   **Ages:** 4 and up   **Duration:** about 10 minutes
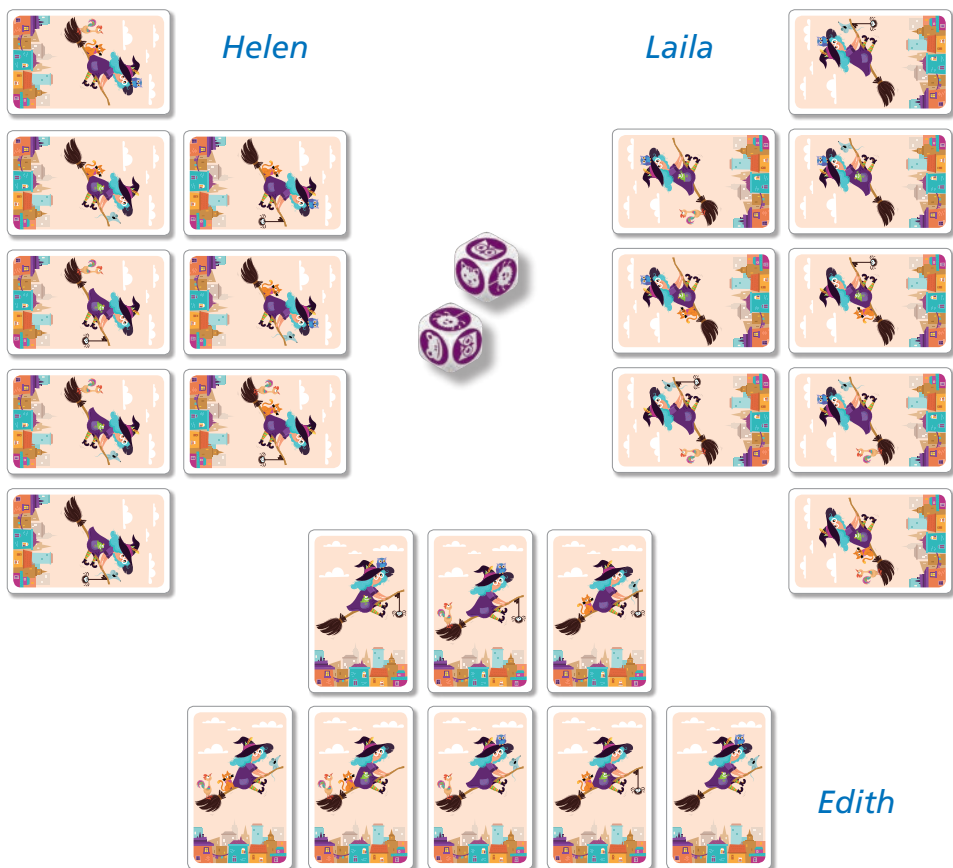

Contents:

24 witch cards   *2 animal dice*

The Aim of the Game

Over three short rounds, try to spot the animals showing on the dice on your cards. When you find the animals, turn over your cards. The first player to turn over all of their cards wins the round and gets all the cards the other players haven't turned over yet. If you have the most cards at the end of the game, you win!
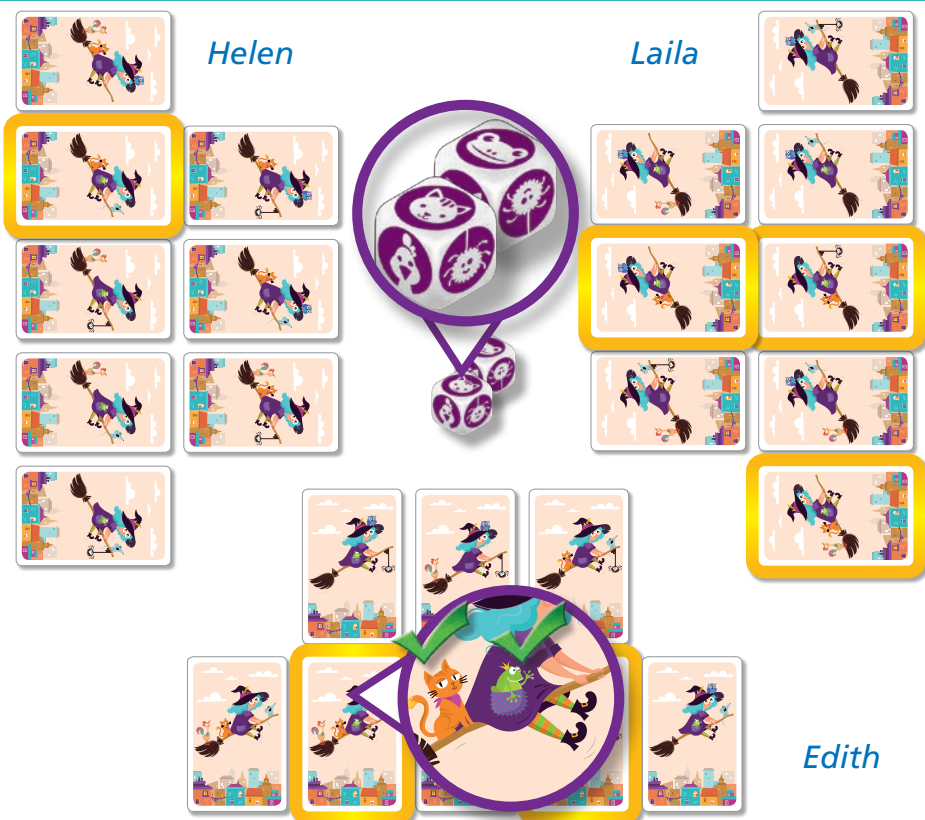

Setup

Give an equal number of cards to each player. Put your cards in front of you, face up. Set the two dice within easy reach of all players.

Helen   *Laila*

Edith

Playing the Game

The game is played over three rounds. The last player to pet an animal takes the dice and rolls them.

Everybody looks at their cards and tries to spot a card that has **both** of the animals showing on the dice. Turn over **all** of your cards that show the two animals. If both dice show the same animal, you only have to find it once to turn over a card! Take your time: it's not a race.
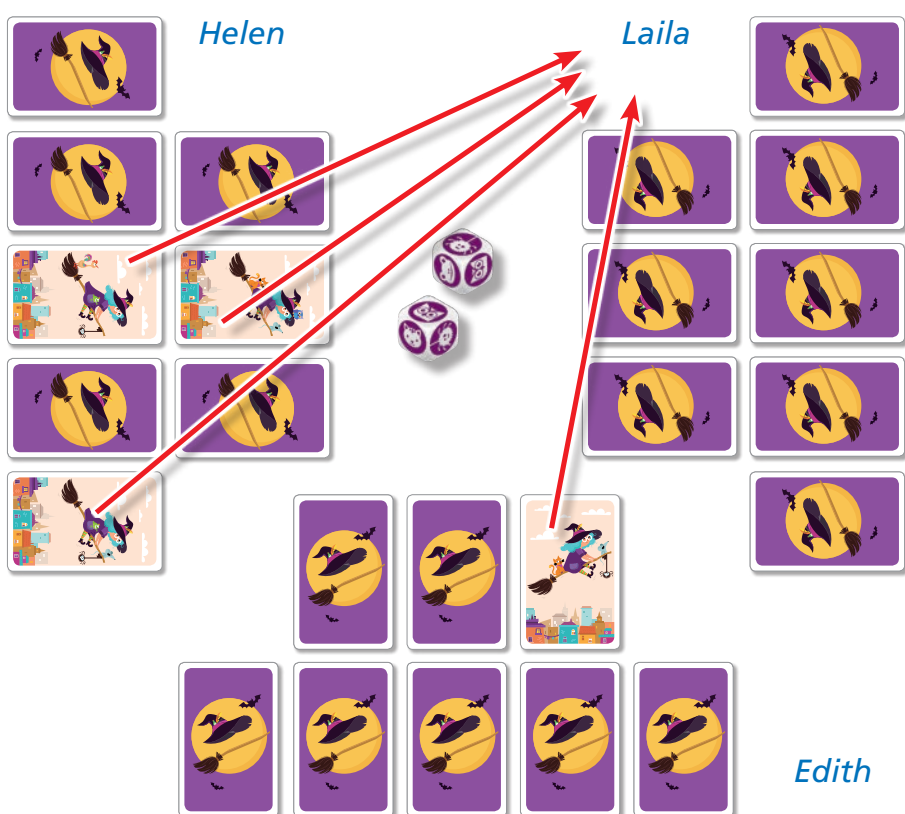

Helen   Laila

Example: Helen rolls the dice and gets a frog and a cat. She can turn over one card, Edith two, and Laila three.
Pass the dice to your left, so the next player can roll them.

The End of a Round

If you're the first to turn all of your cards face-down, you win the round! As a reward, you get all of the cards the other players haven't turned over yet.
If more than one player turns over their last card at the same time, they share the reward. If you can't split it evenly, put the extra cards back in the box.

Helen   Laila

Edith

Example: Edith rolls an owl and a spider. This allows Laila to turn over her final cards. As a reward, Edith givers her one card and Helen three. **In the next round, Laila will play with twelve cards, Edith with seven, and Helen with five.**

The Next Round

Turn your cards back over so they are face-up again—including any you got as a reward. Now start the next round.

The End of the Game

The game ends after the third round. The player with the most cards wins! If there is a tie, you have more than one winner.
